

Yonatan Stelzer

Dr. Stelzer is the incumbent of the Louis and Ida Rich Career Development Chair at the Weizmann Institute of Science. Yonatan received his PhD from the Hebrew University of Jerusalem Israel under the supervision of Prof. Nissim Benvenisty. In 2014, Yonatan joined the laboratory of Prof. Rudolf Jaenisch at the Whitehead Institute of MIT as a postdoctoral fellow. He established his independent lab at the Weizmann Institute in 2017. His lab utilizes single-cell genomics, pluripotent stem cells, and genome editing to study how cell-specific epigenetic programs are established in the early embryo and orchestrate cell state and function.
