

Achia Urbach

Achia Urbach is a Senior Lecturer at the Faculty of Life Science, Bar Ilan University, Israel. Achia completed his Ph.D. at the Hebrew University under the supervision of Prof. Nissim Benvenisty, and his postdoctoral training at Boston Children's Hospital and Harvard Stem Cell Institute under the supervision of Prof. George Daley. The major research topics in his laboratory are:

1. Modeling genetic renal disorders and nuclear envelopathies by human pluripotent stem cells.
2. Studying the role of the Lin28A/Let-7 pathway in diverse tissues during embryonic development.
