

Robert Blelloch is the Peter Carroll Endowed Professor and Associate Chair of Basic Research in the Department of Urology and Institute of Regeneration Medicine and Stem Cell Research at the University of California San Francisco. His research interests revolve around the molecular regulation, including transcriptional, epigenetic, and post transcriptional control, of pluripotency and cell fate decisions during early mammalian development. He has been a member of the ISSCR since its inception and was the winner of the 2011 ISSCR Outstanding Young Investigator Award.
